EXPERIENCE

Jan 2024 - Present

Project Manager - Tribhuvan University

Managing a one-time web development project for the 6th annual conference of Asian Population Association (APA) at Tribhuvan University, Nepal.

Interacting with client actively to understand their requirements, developing software requirement specification (SRS) and transforming them into clear action plans for my agile team. Conducting daily stand-up meetings to ensure project transparency, optimal productivity and timely delivery.

Furthermore, I provide continuous guidance to the front-end design and development along with handling the server-side logic, developing APIs, designing database structure and writing test cases.

Jan 2021 - Mar 2022

Web Developer - Autonomous Technology

Played a central role in the successful execution of a diverse portfolio of web-based projects which included both company's proprietary web applications and those commissioned by the clients.

Initially, started as a Frontend Developer, using JavaScript Frameworks - Vue JS and React Js, then progressed to become a Full_Stack Developer, using PHP Framework Laravel for server-side logic, developing APIs along with MySQL database, and testing APIs with applications such as Postman.

Mar 2022 - Present

Web Developer - Global English Campus (GEC)

Collaborating as a proficient front-end and back-end developer to optimise website performance while introducing innovative features. Thriving within a cohesive team, we execute diverse tasks underpinned by strong mutual understanding and unwavering cooperation among team members.

Backend: Developing the server-side logic with the PHP Framework Laravel - creating and maintaining APIs, writing test cases, along with designing and developing the database structures in MYSQL database.

Frontend: Designing and developing the user interface (UI) using JavaScript frameworks Vue JS to build complex UI and ensure a seamless user experience (UX), while implementing best practices for usability and accessibility.

Apr 2020 - Dec 2020

Web Developer - Freelance

Developed E-Commerce websites for multiple companies utilising the PHP MVC Framework Laravel with Vue JS serving as the front-end framework.

Jun 2019 - Sep 2019

Volunteer - ICS Raleigh

Worked as part of a team of 15 in a community in Gorkha, Nepal to encourage sustainable development through raising awareness about various social issues and building polytunnels to promote off-season farming

EDUCATION

PG Diploma in Computer Application

Kantipur City College, Purbanchal University
2022

Delved into extensive computer applications, information technology, and mathematics coursework, concluding with a project in C Programming and MySQL database.

Bachelors in Business Studies

Nepal Kasthamandap College, Tribhuvan
University
2015 to 2019

Immersed myself into a comprehensive curriculum enriched in various aspects of business, including finance, marketing, project management, and economics.

Data Structures and Algorithms

freeCodeCamp
2020

Achieved certification in freeCodeCamp's data structures and algorithms curriculum, sharpened problem-solving skills and a deeper understanding of fundamental computational principles.

SKILLS

- Experienced in building robust back-end logic and providing APIs using PHP with a specialisation in Laravel, including implementation of comprehensive test cases for optimal performance and reliability
- Skilled in designing and developing MYSQL databases, prioritising data integrity and database normalisation.
- Proficient in Vue.js and React.js for frontend development, adept at building responsive and user-friendly interfaces while optimising code for enhanced performance and reliability.
- Skilled in crafting dynamic and visually engaging frontend experiences using Bootstrap, Ant Design and Sass.
- Experienced in version control and collaborative software development using Git and Github.
- Familiar with Scrum-Agile methodology, that includes sprint planning, daily stand-ups and sprint review.
- Very good at team collaboration, smooth information flow.

INTERESTS

- Trekking
- Photography
- Guitar
- Stop-Motion Animation
- Reading Books
