## INTRODUCTION

I am an enthusiastic and aspirational person with excellent communication skills who has a thirst for learning. I have built experience on web development by managing and delivering various projects before deadline, thus, satisfying the clients. I am looking forward to learn more and harness my skills in web development.

## SKILLS

- Experienced in Web Development using PHP framework Laravel along with Vue JS and MYSQL or SQLite database following SDLC
- Experienced in Front-End Development using Bootstrap and Sass
- Experienced in using Node Package Manager (NPM) and Git/Github
- Experienced in Graphic Designing through paid projects with various companies
- Experienced in Adobe Photoshop, Illustration, Lightroom and Premiere Pro
- Excellent communication skills, able to communicate verbally and written with individuals from all levels and adjust my communication style towards my target audience
- Confident interpersonal skills allowing me to build relationships with peers, colleagues and clients
- Productive team working skills; able to motivate, support and encourage others to work towards a unified goal while also being proactive when working on my own initiative
- Flexible approach to work and adapt to changing environments and situations
- Highly organised individual, able to manage multiple tasks, prioritise my work and manage my time effectively to ensure deadlines are met
- Learning Attitude
